**CDM
Smith**

Priority 1

- Several extreme values occurred on 10/30/19 during first week of cool season sampling that were determined to be outliers when compared with the long term record

Priority 1

- 2,400 Enterococci mpn/100mL at Lake Elsinore
- Very low *E. coli* in same sampling event for Lake Elsinore

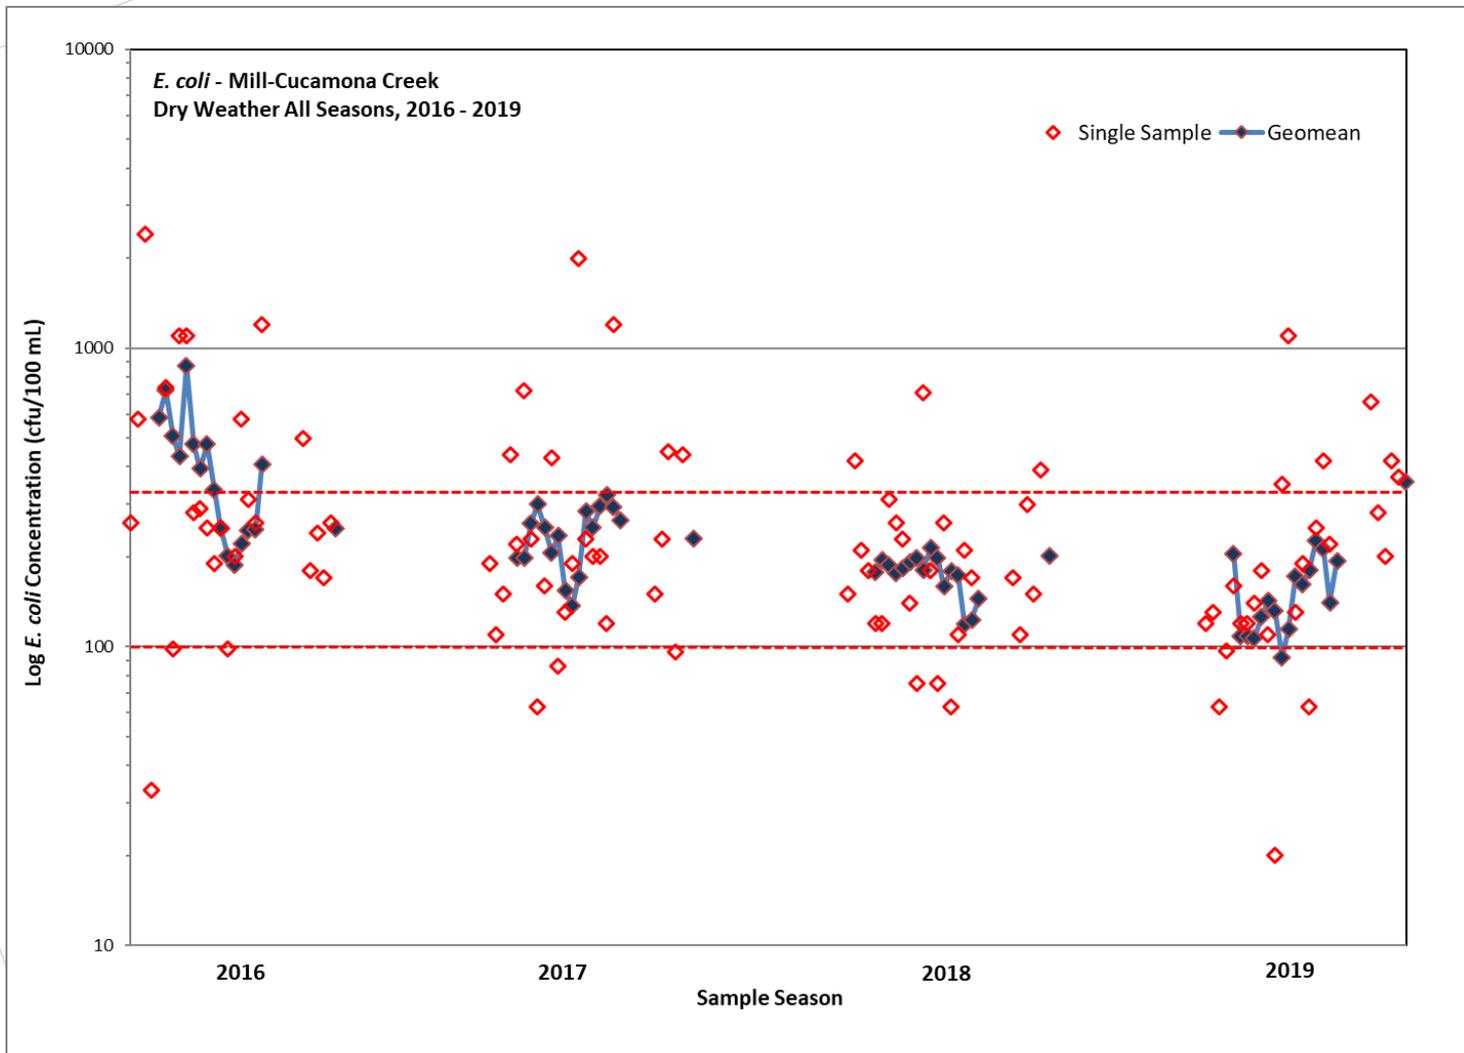

outlier

Priority 2

- Sites that have appeared to be trending downward experienced elevated dry weather *E. coli* in 2019-20 cool season

Priority 2 – TMDL Sites

Priority 2 – TMDL Sites
